

Asbestos Jobs Online

Technical Sheet

Architecture

AJO

A unique SaaS platform enabling the user to control every aspect of a removal project from anywhere on the planet, 24 hours a day.

User and Business Friendly

The logic is intuitive and compliance is built in. The technologies used are proven and robust.

Cost Effective

Using AJO will reduce project costs significantly due to a radical integrated digital approach to a currently fragmented paper-based operation.

Core Components

The AJO web application architecture is built using the most reliable business grade technologies including.:

PHP / MySQL Server / Javascript / JQuery / AJAX / Bootstrap 3.0 / XML / HTML 5
